Professional Summary

Generative AI Engineer and Computer Science Engineering student at KIIT (CGPA: 9.07/10) specializing in LLM fine-tuning, multi-agent systems, and RAG pipeline architecture. IBM-certified AI/ML Engineer (95% assessment score) with hands-on production experience in LLM orchestration, prompt engineering, and vector database retrieval using LangChain, LangGraph, FAISS, Pinecone, and ChromaDB. Proficient in Python, TensorFlow, PyTorch, and full-stack deployment via Docker and Railway. Seeking GenAI Engineer Intern role to design and deploy large language model pipelines and agentic AI systems for enterprise applications.

Technical Skills

Generative AI & LLMs: LLM Orchestration, Prompt Engineering, LLM Fine-tuning, LLM Evaluation, Instruction Tuning, Retrieval-Augmented Generation (RAG), Agentic AI Workflows

Agentic AI & LLM Frameworks: LangChain, LangGraph, Multi-Agent Orchestration, RAG Pipelines, Tool Calling, ReAct Agents

AI/ML & Deep Learning: TensorFlow, PyTorch, Scikit-learn, Neural Networks, CNN, RNN, Transformers, NLP, Reinforcement Learning, Feature Engineering, Hyperparameter Tuning

Vector Databases & Retrieval: ChromaDB, FAISS, Pinecone, Semantic Chunking, Embedding Models, Similarity Search

Programming Languages: Python, JavaScript, Java, C, HTML5, CSS3

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Statistical Analysis, EDA, Power BI

Web Development: React, Node.js, FastAPI, Flask, Streamlit, RESTful APIs, Tailwind CSS

DevOps & Cloud: Docker, Git, GitHub, CI/CD Pipelines, Railway, AWS (Familiar)

Professional Experience

Summer Intern – National Informatics Centre, Govt of India

May 2026 – Present

Shillong, Meghalaya, India

- Building and improving production-grade government web applications serving real end users, contributing to reliability, usability, and performance optimization
- **AMO ESIS Website Revamp** – Enhancing a live platform with improved frontend responsiveness and backend stability; applying software engineering best practices in a regulated production environment
- **NIC Coffee Table Book** – Led documentation design and content structuring, delivering a polished publication with clear information architecture and editorial accuracy

Projects

AgentResearch.ai – Autonomous Multi-Agent Research Pipeline | *Live*

Jan 2026 – Feb 2026

Python, LangGraph, LangChain, Llama 3.3 70B (Groq), Tavily Search, HuggingFace FLUX.1, FastAPI, React 18

- Architected 5-node agentic AI orchestration pipeline using LangGraph with LLM-powered autonomous reasoning — Router → Research → Orchestrator → Parallel Worker Agents → Reducer — with Tavily-powered live retrieval across three routing modes (*closed_book*, *hybrid*, *open_book*)
- Deployed full-stack generative AI application (FastAPI + React 18) with parallel LLM worker nodes, HuggingFace FLUX.1 image generation, and real-time blog library management — live on Cloudflare Pages and Render

DocQueryAI – RAG-Powered Document Intelligence Platform | *Live*

Dec 2025 – Jan 2026

Python, LangChain, Llama 3, ChromaDB, FAISS, PyPDF2, Streamlit, Railway

- Architected production RAG pipeline using LangChain and Llama 3 with semantic chunking, ChromaDB vector retrieval, and FAISS-compatible embedding storage — achieving 90%+ context-aware QA accuracy across 50+ page documents with sub-2-second response latency
- Deployed conversational LLM interface on Railway with Streamlit, supporting concurrent users at 99% uptime — demonstrating end-to-end production-grade RAG system deployment

Education

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar

Jul 2023 – Jun 2027

B.Tech in Computer Science Engineering – CGPA: 9.07/10.0

Border Security Force School, Shillong – Senior Secondary (XII), CBSE – 92%

Aug 2021 – Mar 2023

Stream: Science (PCM + Computer Science)

Certifications & Achievements

Research Publication – Hybrid QLSTM Neural Network for Air Quality Forecasting – 2026

Top 10% Ranking - MumbaiHacks, India's largest Agentic AI hackathon (500+ participants) – 2025

UiPath Automation Developer – KIIT Training & Placement, designed and deployed 3 RPA workflows improving operational efficiency by 60% using UiPath Studio, workflow orchestration, and exception handling – 2025
